The world's leading
sprinkler shut off tool

 **Shutgun** *shuts off fire sprinklers fast!*

A simple and elegant solution to a messy problem.

Designed and tested to **shut off activated fire sprinkler heads instantly**, Shutgun is your best defense against the expensive and hazardous effects of water damage.

Water from a sprinkler head can exceed 25 gallons per minute causing thousands of dollars in damage every minute left running. Simply place the jaws in the opened sprinkler head with one hand and squeeze the handle once or twice and the water will stop immediately.

Tested by UL®, facilities and fire departments

Unique fusible link will release in case of fire reactivating the sprinkler.

Shutgun is a small investment that can save you thousands, can you afford not to have one?
